### JEEP BRAND 4x4 SYSTEMS

JEEP ACTIVE DRIVE Put your capability on automatic pilot. This available 4x4 system does the work for you, targeting exactly when you need a boost of traction. It features a single-speed Power Transfer Unit (PTU) that combines proven Jeep Brand capability with welcome efficiencies to deliver a double whammy of 4x4 prowess and fuel-saving smarts. Jeep Active Drive can seamlessly transition from FWD to 4WD and back again, thanks to the system's smart rear-axle disconnect that operates in tandem with the available Selec-Terrain® Traction Management System's Auto mode. Under normal driving conditions, the front wheels provide most of the traction. But should the front wheels start to lose grip, power automatically transfers to the rear wheel(s), so you seamlessly maintain optimal traction without having to take additional action.

JEEP ACTIVE DRIVE LOW This system gives Trailhawk® its super powers to easily conquer tough ridges, rocks and weather, or the extra determination to pull a boat out of a lake. This one-speed system features Hill Descent Control that adds extra control over throttle, speed and braking, allowing you to smoothly travel down steep hills. Dial in to Rock mode when you need the boost of a 21:1 crawl ratio. Exclusive to Trailhawk.
