Add the available eTorque Technology with a supplemental 130 lb-ft of eTorque. More than just torque, eTorque works with the standard MDS/FuelSaver Technology to deliver excellent V8 4x4 fuel economy and a V8 driving range of up to 848 km (527 mi).¹¹ The eTorque electric motor creates a mild-hybrid system to help refine Stop/Start capability; it also creates a generator for the regenerative braking, converting kinetic energy to recharge the battery system.

An LCD monitor displays real-time video that improves the driver's ability to see behind the vehicle. Buttons on the mirror adjust brightness and shift the displayed image up and down for customized viewing.

TRAILER REVERSE STEERING CONTROL (TRSC)

New available TRSC enables a driver to intuitively and precisely reverse steer a trailer via camera vision. Unlike other systems, ours is self-calibrating and does not require the use of trailer-mounted positioning stickers and related calibration manoeuvres.

TRAILER TIRE PRESSURE MONITOR

Available on all trim levels, this system monitors the trailer tire pressure and alerts the driver when a low tire situation is detected. The system can be programmed to set the unique pressures for up to six trailers/RVs.

SELF-LEVELLING AIR SUSPENSION

The available Active-Level™ Four-Corner Air Suspension System automatically adjusts the truck's suspension height when it's loaded to ensure a level ride.

The available air suspension system simplifies ball/hitch alignment, counteracts weight from trailering/hauling, maintains an even and level profile when loaded, and keeps rake constant from the front end to the rear of the trailer.

NEW ACCESSORY GAUGES PAGE

Viewable from the touchscreen radio, the available Gauges App provides a view of vehicle gauges used to monitor vehicle status while towing and hauling. Included with the available Off-Road Group.

ADVANCED TECHNOLOGY ABOVE, BELOW AND BEYOND

BLIND-SPOT MONITORING WITH REAR CROSS-PATH AND TRAILER DETECTION.¹² This smart system scans the blind-spot zones beside and behind the vehicle to help ensure trailer safety during manoeuvring while automatically sensing and accounting for the length of the trailer. Available.

LANE DEPARTURE WARNING PLUS¹²

To prevent drifting, the available Lane Departure Warning Plus system¹² keeps you in your lane by warning you visually and adjusting your steering when the system detects lane drift.

SMART CRUISING

Adaptive Cruise Control with Stop and Go¹² detects vehicles ahead. If increased braking is needed in slower traffic, the Forward Collision Warning with Active Braking¹² automatically helps adjust to a safe distance. Available.

GUIDED PARKING

Parallel and Perpendicular Park Assist¹² provides active guidance when parking. The guidance system directs you to engage the gear position, brake and accelerator while it automatically controls steering. Available.

ELECTRONIC PARKING BRAKE

Multifunctional, it features five operational modes, including Safe Mode and Drive-Away Release.

Front and back, Ram 1500 standard rotors measure up—and they're the largest brakes in their class: nearly 378 mm (15 in) in diameter.⁹

AIR BAG TECHNOLOGY¹⁴

Advanced multistage front air bags, supplemental front-seat side-mounted air bags and side-curtain air bags.

SPLAYED FRAME RAILS

Direct energy away from the cabin and into the frame rails.

DYNAMIC FRONT CRUMPLE ZONES

A real factor that contributes to safety, they absorb the energy from impact loads.

STRENGTH FROM THE INSIDE OUT. A strong foundation is the backbone of true capability. The Ram 1500 frame construction is built to last, with 98 percent of the steel used in the frame comprised of high-strength steel. The result is exceptional durability and excellent handling.

TOUGH STEEL FRAME
