## ALL-WEATHER 4x4 POWER

### SELEC-TERRAIN® TRACTION MANAGEMENT SYSTEM

Five selectable settings let you dial in to the type of Four-Wheel-Drive (4WD) traction control your Grand Cherokee needs at any particular moment. Selec-Terrain® pairs with an available 4x4 system, giving you the ability to tailor your capability to the road and driving conditions.

Selec-Terrain helps to adapt traction performance with a selectable dial that features Auto, Snow, Sand, Mud and Rock settings. This intelligent system gives you ultimate driving confidence by coordinating 12 vehicle systems, including throttle control, transmission shifting, transfer case, traction control and Electronic Stability Control (ESC).<sup>18</sup> Sport Mode delivers a more aggressive traction performance and is activated via a one-touch button. Available.

**AUTO** When turned to this mode, Selec-Terrain does all the work, automatically adjusting vehicle dynamics to best suit the road. To help ensure optimal efficiency, the front driveline disengages when not needed.

**SNOW** Adjusts for ultimate performance over snow- and ice-covered roads by maximizing vehicle stability and minimizing oversteer. Major systems auto-engaged and managed in this mode include antilock brakes and traction control.

**SAND** The system converts to a uniquely calibrated Sand Mode that utilizes aggressive throttle and upshift points to tackle looser, sand-covered surfaces.

**MUD** Maximizes low-speed traction by allowing additional wheel-slip via specifically tuned chassis controls, differentials and transmission ratios that are geared to successfully tackle mud.

**ROCK** Delivers Trail Rated® 4WD Low capability thanks to its rear-differential locking element, allowing you to crawl over rugged terrain at appropriately safe speeds. Exclusively on Trailhawk.®

In-depth vehicle diagnostics, including wheel turn, articulation and transmission temperature, all help to provide an optimized experience. Included with 8.4-inch touchscreen.

**SELEC-SPEED™ CONTROL** Adds Hill Ascent Control to the familiar Hill Descent Control.
